Subject: Village agrees with Town Engineer's Finding and Conclusions?
Attachments: 2008_08-08 Response from Village.pdf; Report_Zangrilli Reference.pdf; Town Engineer Timesheet.pdf

Mr. Gibbs,

On 8/5/08; I submitted a FOIL request to the Village of Yorkville. I requested access to all records, including emails, that in any way possible could be construed to support a claim by the Town Board that the Village Mayor, Village Highway Superintendent, and Village Engineer “**take no exception to the findings and conclusions reached by the Town’s Engineers**”.

Yesterday I received a response from the Village, copy attached. In their words, “**The records that you requested do not exist.**”

Since the Resolution specifically attributes this assertion to the Town Board; please provide me with the date, time and location of the meeting that included a quorum of the Town Board and the referenced Village Officials; out of which came the Resolution’s text.

Additionally,

The Town Engineer’s Report, on Page 3-4 (copy attached), references a meeting with Mr. Zangrilli, Village Engineer. The text indicates that a meeting occurred and pipe capacity was discussed. However, the report fails to make any clear statement that Mr. Zangrilli supported the **revised** pipe capacity calculated by the Town Engineer. If Mr. Zangrilli did agree, I find it odd that the Town Engineer wouldn’t have stated such in an effort to bolster his argument that Mr. Zangrilli’s previous calculations were flawed.

Even more confusing, the Town Engineer indicates that this meeting occurred on 6/12/08. However, the attached timesheet indicates that 12-inch pipe capacity calculations weren’t prepared until 6/19/08. Perhaps I should also question how calculations included in a Report dated 6/18/08 were completed on 6/19/08.
